TELESONIC FIELD SERVICE ITSM

Step-by-Step Operational & Presentation Guide for Core Modules
Verified Working Modules: Masters (/masters), Transactions (/transactions), Dashboard (/dashboard)

Target Audience: System Demonstrators, Operations Leads & Auditors

Purpose: Step-by-step instructions on operating and showcasing data saving, part catalog integrations, work orders, pricing recalculations, and executive single-page dashboards.
Status: All 3 Tiles 100% Frontend Active with LocalStorage State Persistence.

TABLE OF CONTENTS & PRESENTATION SEQUENCE

ï¿½ Section 1: Workspace Launcher & Navigation Architecture (Route: /)
ï¿½ Section 2: Tile 1 ï¿½ Masters Management (Route: /masters) ï¿½ Detailed Step-by-Step
ï¿½ Section 3: Tile 2 ï¿½ Transaction Processing (Route: /transactions) ï¿½ Parts Saving & Work Orders
ï¿½ Section 4: Tile 3 ï¿½ Unified Service Operations Dashboard (Route: /dashboard) ï¿½ Single Page View
ï¿½ Section 5: 5-Minute Live Presentation Script (Exact talking points & clicks)

SECTION 1: WORKSPACE ARCHITECTURE & LAUNCHER (ROUTE: /)

The entry point of the application is the Servio Workspace launcher (at /). As required by the system rules, login returns to this launcher so that all operational modules remain accessible without requiring a persistent lateral sidebar. The three highlighted presentation tiles are prominently positioned:

Transactions (/transactions)
Job cards, service quotes, warranty claims, spare parts requests with dynamic calculations.

Masters (/masters)
28 master screens including spare parts catalog, multi-component equipment, price lists, SLA skills.

Dashboard (/dashboard)
Unified single-page continuous view containing all 7 monitoring, KPI, queue, and audit screens.

SECTION 2: TILE 1 ï¿½ MASTERS MANAGEMENT (/masters)

Overview & Purpose:

The Masters module manages all foundation reference data for HVAC/R service operations across Sri Lanka.
It implements 28 standardized master screens based on the A2 Specification Table, with full tab navigation,
add-part catalog integration, editing, deletion, and local storage data persistence.

Key Master Screens to Showcase During Presentation:

ï¿½ **MST-05 - Item / Spare Parts Master:** Catalog of compressors, R410A refrigerant, inverter PCBs, sensors, contactors with warehouse stock and unit
ï¿½ **MST-08 - Multi-Component Equipment Master:** Hierarchy mapping outdoor condensing units (ODU) and indoor fan coil units (IDU) with serials.
ï¿½ **MST-25 - Price List & Discount Master:** Standard commercial tariffs, dealer discounts, and warranty labor price lists in LKR.
ï¿½ **MST-06 - Technician Skills & Certification:** Skill matrix (VRF Level 3, Chiller Overhaul, Electrical A-Grade) for auto-dispatching.
ï¿½ **MST-01 - Branch & Service Center Master:** Colombo Central, Kandy, Galle, Negombo service hubs with GPS coordinates and stores.

Step-by-Step User Instructions for Masters:

Step 1: Open Masters Module **Click on the 'Masters' tile from the workspace launcher (or navigate to /masters).**

Notice the searchable sidebar on the left listing all 28 registered master screens grouped cleanly.

Step 2: Select a Master Screen (e.g., MST-05 or MST-08) **Click 'MST-05 Item / Spare Parts Master' or 'MST-08 Multi-Component Equipment' in the sidebar.**

The screen loads with its official metadata, status badge, audit trail timestamp, and configured tabs.

Step 3: Add a New Part / Line Item to the Master **Click the green '+ Add Part / Row Item' button located above the tab table.**

An interactive modal opens. You can pick from the Telesonic Genuine Spares Catalog (e.g. Daikin Inverter Compressor, Copeland Scroll, or R410A) or e

Step 4: Save the Part and Verify Immediate Display **Click 'Save Line Item' inside the modal.**

The row is immediately appended to the table with a green 'New' badge. A success notification banner confirms: 'Master Line successfully added and sav

Step 5: Modify Header Attributes & Commit Record **Edit any header field (e.g., Change Item Description, Category, or Minimum Stock) and click 'Save Recor**

The state is committed to browser localStorage. Refreshing or switching screens preserves your changes.

Step 6: Deletion / Cleanup (Optional) **Click the red trash icon on any added row to remove it instantly from the master dataset.**

A confirmation notification informs you that the row was removed and storage updated.

SECTION 3: TILE 2 ï¿½ TRANSACTION PROCESSING (/transactions)

Overview & Purpose:

The Transactions module powers day-to-day HVAC/R service workflows: field job dispatch, parts requisitions, quotations, AMC contracts, and warranty processing across 42 registered transaction screens.
It features live cost and price calculation, spare parts modal integration, and real-time hold validation.

Recommended Transaction Screens to Showcase:

ï¿½ **TRX-17 - Parts Issue & Return Request:** Dispatching genuine parts to field technicians; tracks warehouse deductions and unused returns.
ï¿½ **TRX-35 - Service Quotation & Estimation:** Estimates compressor replacements, copper piping, refrigerant charges with automated LKR markup.
ï¿½ **TRX-02 - Job Card Execution / Field Service:** Core field work order capturing technician diagnostics, parts consumed, customer signoff.
ï¿½ **TRX-26 - Equipment Commissioning Certificate:** Commissioning test readings (suction/discharge pressures, amp draw, refrigerant charge).
ï¿½ **TRX-31 - Annual Maintenance Contract (AMC):** Scheduled preventive maintenance cycles, billing schedules, and contracted SLA terms.

Step-by-Step User Instructions for Transactions:

Step 1: Open Transactions Module **Click on the 'Transactions' tile from the workspace launcher (or navigate to /transactions).**

The transaction workspace displays a category-filtered sidebar (Requisitions, Service, Contracts, Warranty, Billing).

Step 2: Choose a Transaction (e.g., TRX-17 or TRX-35) **Click on 'TRX-17 Parts Issue / Return Request' or 'TRX-35 Service Quotation'.**

The work order view loads with its Transaction Number (e.g., REQ-2026-0881), Status (In Progress/Draft), and SLA priority.

Step 3: Switch to the 'Parts & Materials' Tab **Click on the 'Parts & Materials' or 'Line Items' tab in the middle navigation.**

The live table displays currently allocated parts along with summary metrics: Total Lines and Total Amount (LKR).

Step 4: Click '+ Add Spare Part' to Open Spare Catalog **Click the prominent '+ Add Spare Part' button above the parts table.**

The Telesonic genuine catalog opens. Select a part such as 'Daikin 3HP Inverter Compressor (LKR 125,000)' or 'R410A Refrigerant Cylinder (LKR 28,50

Step 5: Adjust Quantity, Warehouse, or Pricing and Save **Set Quantity = 2, confirm Unit Price and Warehouse (e.g., Colombo Main), then click 'Save Line Item'.**

The spare part is instantly inserted into the transaction table. The total value is dynamically recalculated (e.g. + LKR 250,000).

Step 6: Click 'Save Transaction' to Commit Record **Click the blue 'Save Transaction' button in the upper header toolbar.**

An in-app toast notification appears confirming successful persistence: 'Transaction REQ-2026-0881 saved successfully'.

Step 7: Test Creating a Fresh Transaction Record **Click '+ New Record' in the top bar to initialize a blank work order template.**

Fields are reset with a fresh sequential reference code, ready for demonstration.

SECTION 4: TILE 3 ï¿½ UNIFIED SERVICE DASHBOARD (/dashboard)

Overview & Purpose (Unified Group-Wise Single Page):

As specified in the requirement document (Tel.pdf A6), all dashboard screens are unified into a single continuous scrollable page grouped by functional domain, with sticky fast-jump navigation at the top. This delivers real-time operational pulse, hold management, financial KPIs, queues, and audit trails.

The 3 Dashboard Groups & 7 Included Screens:

GROUP 1: Live Monitoring & Operational Pulse

ï¿½ O1-SCR-DSH-01: Heartbeat Pulse ï¿½ Live SLA gauges, active technicians, and unresolved emergency tickets.

ï¿½ O1-SCR-DSH-02: Hold Monitor ï¿½ Interactive resolution for Credit Limit, Spare Parts, and Warranty Approvals.

ï¿½ O1-SCR-DSH-03: Repeat Job Analysis ï¿½ 30-day recall rates, faulty part correlations, and technician coaching.

GROUP 2: Executive & Financial Performance

ï¿½ O1-SCR-DSH-04: Management KPI Dashboard ï¿½ Revenue (LKR 28.4M), First-Time-Fix Rate (89.2%), CSAT score.

ï¿½ O1-SCR-DSH-06: Report Viewer & Downloader ï¿½ Filter reports by branch and export genuine CSV spreadsheets.

GROUP 3: System Integration & Data Governance

ï¿½ O1-SCR-DSH-05: Integration Queue ï¿½ Live status of SAP B1 DI Server, Dialog SMS, with interactive RETRY action.

ï¿½ O1-SCR-DSH-07: Export Audit Log ï¿½ ISO 27001-compliant immutable log with cryptographic SHA-256 validation.

Step-by-Step User Instructions for Dashboard:

Step 1: Open Unified Dashboard **Click 'Dashboard' from the workspace or open /dashboard.**

The entire operations deck loads in one clean view. Notice the live ticker bar showing active emergency jobs.

Step 2: Use Sticky Section Anchors to Jump Between Groups **Click on 'Operational Pulse', 'Financial & KPIs', or 'Integration & Audit' in the sticky sub-header.**

Smoothly scrolls directly to the corresponding section without reloading.

Step 3: Test Interactive Hold Resolution on DSH-02 **Locate the 'Hold Monitor' card. Click 'Release Hold' or 'Approve Overwrite' on a blocked job card.**

The hold status changes in real-time to 'Resolved' or 'Processing', simulating dispatch unblocking.

Step 4: Test Real CSV Report Export on DSH-06 **Scroll to 'Report Viewer'. Select a Report Type (e.g., Spare Parts Consumption) and click 'Export CSV'.**

Your browser immediately downloads a genuine Excel-compatible CSV file with actual report metrics.

Step 5: Test Integration Retry on DSH-05 **Scroll to 'Integration Queue'. Click 'Retry Payload' on any failed SAP B1 sync item.**

The record transitions to 'Retrying' and then 'Success (Synced)', proving active front-end reactivity.

SECTION 5: 5-MINUTE LIVE PRESENTATION DEMO SCRIPT

Presenter's Rehearsal Script (Follow this step-by-step during your presentation):

[0:00 - 1:00] **Workspace Entry & High-Level Architecture**

Say: "Good morning/afternoon team. Today I am presenting the Servio ITSM system for Telesonic. Notice our clean Workspace at the root route (/), keeping all modules accessible. Today we focus on three core operational engines: Masters, Transactions, and the unified continuous Dashboard."

Action: Show the / route. Highlight the Transactions, Masters, and Dashboard tiles.

[1:00 - 2:15] **Tile 1 Demonstration ï¿½ Masters (/masters)**

Say: "First, let's step into Masters. Here we maintain 28 master records. Let's open MST-05 (Spare Parts) or MST-08 (Multi-Component Equipment). Notice how easy it is to add a new spare part: I click '+ Add Part / Row Item', select a Daikin Inverter Compressor from our genuine catalog, confirm its warehouse stock, and click Save. Notice the instant confirmation and that this data is persistently stored in local storage."

Action: Click Masters tile -> Select MST-05 -> Click '+ Add Part / Row Item' -> Pick catalog item -> Click Save -> Point out green 'New' badge.

[2:15 - 3:45] **Tile 2 Demonstration ï¿½ Transactions (/transactions)**

Say: "Next, let's move to Transactions where field operations happen. I'll open TRX-17 Parts Issue / Return Request or TRX-35 Service Quotation. Here we see the active work order with priority and SLA countdown. Let's add spare parts to this order: click '+ Add Spare Part', pick our genuine R410A refrigerant or capacitor, enter quantity 2. Watch how the total amount immediately calculates and updates in real time. When I click 'Save Transaction', the entire job order is safely committed with confirmation."

Action: Click Transactions -> Select TRX-17 -> Click 'Parts & Materials' tab -> Click '+ Add Spare Part' -> Save part -> Note live sum update -> C

[3:45 - 5:00] **Tile 3 Demonstration ï¿½ Unified Dashboard (/dashboard)**

Say: "Finally, let's examine our unified Dashboard. In accordance with the A6 specification, all 7 dashboard screens are seamlessly integrated into a single continuous page, grouped into three logical operational tiers. Group 1 gives us real-time SLA pulse, repeat jobs, and an interactive Hold Monitor where we can unblock credit-held jobs with one click. Group 2 gives executives instant financial KPIs and a live CSV Report Exporter. Group 3 ensures data governance with live SAP B1 queue health and cryptographic audit logs. Everything is responsive, reactive, and presentation-ready."

Action: Click Dashboard tile -> Scroll through Groups 1, 2, and 3 -> Click 'Release Hold' in Hold Monitor -> Click 'Export CSV' in Report Viewer
